- ✓ Historical Reports
- ✓ Batch Timesheet Entry (Professional)
- ✓ Salary Forecasting
- ✓ Salary Monitoring (Professional Reconciliation Assistance)
- ✓ Multiple Company Payslip Printing, Reports and Payroll Update (Professional)
- ✓ HMRC Accreditation and Award Winning

What is it?

A flexible payroll processing system that calculates, records and reports on staff wages and salaries and includes staff management tools.

Who is it for?

Small to medium sized businesses, and businesses that are growing. You don't need to be a payroll expert and you don't need to know everything about using a computer, expertise is not a necessity, as step-by-step guides show you how to carry out each task.

What does it do?

It manages and organises payments to all your staff, automatically making the correct deductions such as tax, National Insurance and pension contributions. It automatically calculates statutory payments such as Sick Pay and Maternity Pay. It prepares annual returns for HM Revenue & Customs (HMRC) which can be submitted electronically. It produces statutory reports such as P45s which can also be submitted electronically.

It keeps staff information including appraisals, training records, job history as well as holiday and sickness leave. It also produces reports for inspection visits by HMRC and it keeps historical records of statutory reports.

You can add more employees, more users, more companies.

How will it help?

It keeps you in control, guarantees accuracy and guarantees you comply with the law. If your business is growing, you won't need to change to another payroll system.

Extra help?

SageCover

Gives technical support plus practical advice and guidance on managing your business.

For example, you can find out how to make charitable donations via your payroll, how to arrange flexible working schemes, stay compliant with legislation through your year end updates.

Sage Training

Helps you get to grips with the software.

For example, Sage 50 Payroll Stage 1 classroom training can help with creating employee records, pay elements and pension schemes.

Sage Business Stationery

Is designed to work with your Sage 50 Payroll.

For example, our range of payslips help project a professional appearance to your employees.
